- Cloud Servers

VPOP3 is a fully-featured Windows Email Server. It is designed to be simple to configure and use, but flexible enough to fulfil most user's requirements.

VPOP3 has a built-in spam filter which can detect over 80% of spam and offensive email before it reaches your users, it can also detect and block email virus automatically using the VPOP3 Antivirus or Sophos antivirus engine.

VPOP3 will work with any Internet email account which supports POP3 or SMTP methods for incoming mail, and SMTP for outgoing mail. It will also work without an Internet email account at all, using direct SMTP email reception and sending. VPOP3 will work with any type of Internet connectivity - from a dial-up modem, through ISDN and broadband xDSL connections to permanent leased lines.

VPOP3 integrates with the VPOP3 Antivirus, or Sophos SAVI virus scanning engines to detect and remove virus from your incoming and outgoing email
