chemicals

CORE FOCUS

SNK® SPECIALITY WORKS

Making
Structures Safe

Certified with

PRODUCTS

CONCRETE ADMIXTURES

Concrete admixtures (additives) enhances the properties of concrete for applications in construction with special requirements.

WATERPROOFING CHEMICALS

Waterproofing is the formation of an impervious barrier over surfaces of foundations, terraces, roofs, walls and other structural members of construction to prevent water penetrations through these surfaces.

TILE ADHESIVES

Tile adhesives are used for fixing tiles on the walls, floors, swimming pools, etc., which may have any type of substrate such as cement, wood, glass, etc.

GROUTS

Grouts are used for machine foundations, Concrete Strengthening, Waterproofing, Tile joint filling, Rebar fixing.

GLASS FIBER PRODUCTS

Fibres are usually used in concrete or plaster to control cracking. They also produce greater impact, abrasion and shatter resistance in concrete.

PU SEALANTS

Polyurethane sealants are used to fill gaps between wide range of materials and to keep water and air out.

CONCRETE REPAIR MATERIALS

There are various types of materials which are used for the repair of concrete structures. These includes Rust removers, Rust passivators, Polymers, ready mortars, micro-concrete etc.

EXTERIOR COATINGS

Protective coatings for metal / cementitious surface to protect it from weathering & ageing effect

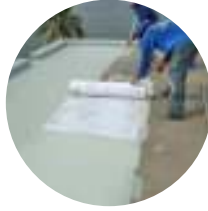

STONE PROTECTOR SEALERS

Protective coatings for natural stones, marbles, granite to protect it from weathering & ageing effect
