Building Maintenance, Repair & Civil Contractors

“Quality & Safety Is Never An Accident; It Is Always The Result Of High Intention, Sincere Effort, Intelligent Direction & Skillful Execution”

All the buildings deteriorate from the time they are completed. The rate of deterioration depends on a number of factors. Not all the factors can be controlled by the occupants of the building.

Building maintenance is work undertaken to keep, restore or improve every part of a building, its services to a currently acceptable standard and to sustain the utility and value of the facility.

The objectives of building maintenance works are:

- (i) To preserve machinery, building and services, in good operating condition.
- (ii) To restore it back to its original standards.
- (iii) To improve the facilities depending upon the development that is taking place in the building engineering.

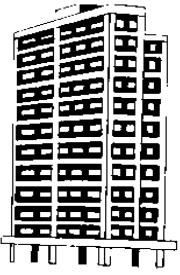

Types of Building Repair and Maintenance Services

- Day to day repairs service facilities : Day to day repairs include service repairs which arises from time to time in the services of the buildings such as in plumbing works, water supply, etc. Examples for such repairs are removing chokage of drainage pipes, manholes, restoration of water supply, replacement of blown fuses, repairs to faulty switches, watering of plants, lawn mowing, hedge cutting, sweeping of leaf falls etc.
Cleaning walls and floors, Cleaning Glass panels and windows, Cleaning Wash areas and toilets
- Annual repairs : This maintenance service is carried out to maintain the aesthetics of buildings and services as well as to preserve their life, some works like white washing, distempering, painting, cleaning of lines, tanks etc. are carried out periodically. These works are planned on year to year basis.
- Special repairs : Special repairs of building are undertaken to replace the existing parts of buildings and services which get deteriorated on ageing of buildings. It is necessary to
