EVA (Ethyl Vinyl Acetate) Low Melt Batch / Inclusion Films

EVA BAGS are low-melt batch / inclusion bags designed for the preliminary process of mixing industry. Our state-of-the-art extrusion and bag-rubber and other materials in the rubber and tyre making equipment ensure the highest quality and consistency for your pre-weigh bags. It melts at 60°-100°C and ensures fluxing into rubber compound.

Usage of Eva Bags In Industries Like

- ⊗ Rubber & Tyre Manufacturer.
- ⊗ Tube & Flaps Manufacturer
- ⊗ Fan Belts, V-Belts, Conveyor Belts, Power Transmission Belts Manufacturer.
- ⊗ Rubber Hose Manufacturer.
- ⊗ Rubber Chemical Manufacturer :- of Silica, Carbon Black Zinc Oxide, Pepitizers,
- ⊗ Rubber Crumb & Other Rubber Chemicals.
- ⊗ For Packing of Rubber, Natural Rubber, Synthetics, reclaimed Rubber Bales.
- ⊗ All other Rubber products Manufacturer using internal Mixer or ban berry.
- ⊗ Processors of Plastic products.

CPE 07 (Chlorinated polyethylene elastomer) Bags

CPE bags are mainly used by the mobile and electronics industries. They are specially prepared packaging materials that help in keeping the electronics or different mobile parts safe during transportation. It is mainly because these materials are soft and acts as cushion to protect the items inside.

Features

1. The item is made using the virgin material. It means that the high-grade item used for the CPE bags is of purest quality.
2. There is a standard size in which you can order the bags. However, if you want a specified size then that is also possible to produce.
3. The thickness of each product is can range between 25-60 microns which makes them of high quality.
4. There is option for custom printing on the bags in accordance with your preference.

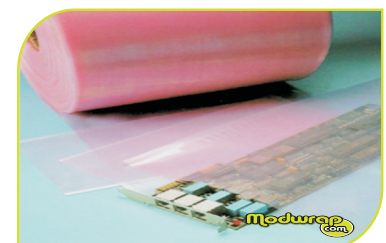

Tamper Proof Bags

Courier Bags are designed for postal and courier transport service. These are light, Strong, waterproof and have Hot melt adhesive strip to keep the product locked. It is widely used by International & Domestic Courier Services, Package Delivery Companies & Online Shopping Portals for transporting Shipments. It is manufactured in high strength having opaque White, Gray, Blue, Black Color or Clear film of thickness between 50 and 100 microns. You can write on it with a permanent marker. It has transparent Pod jacket on the back side of the bag for insertion of waybills or consignment notes.

Anit Static Bags

Transparent / Pink Anti-Static Bag protects sensitive electronics from damage caused by the harmful effects of static electricity. Static travels around the bag and dissipates before it has a chance to damage contents when shipping or storing. These bags are usually plastic and have a distinctive color (silvery for metalized Mylar and other similar plastics, pink or black for polyethylene). The polyethylene variant may also take the form of foam or bubble wrap, either as sheets or bags.

Shrink Films

The principal use to which shrink film is put is as a transit medium. It allows packs to be wrapped individually or collated and offers the best combination of protection and unit cost when compared with the alternatives. Plastic shrink film is used on a vast range of products, from radiators and work surfaces to collation of cans and jars and the individual shrink packaging of cartons and products themselves, such as pizza.

Void Security (Anti Theft) Bags

All of our security bags feature a tamper evident closure system using VOID tape. After inserting the contents, the security bag is sealed. If the closure is opened, it will show some form of tamper evidence (the bag will be torn, the word "VOID" or "OPENED" OR "STOP" will be visible, etc)

If you want to use a transparent bag, but conceal the contents, first place the contents in a opaque envelope or bag, then seal it in the security bag/envelope.

Security bags and envelopes are used to secure documents, personal effects, cash, or other valuables. The Security bags on this page are transparent for viewing the contents, which is required in some applications.

- Protect Your Property
- Chain of Custody Control
- Combat Tampering

Typical applications include crime scene evidence, cash, checks, clinical trials, personal effects for hospital patients, dice and playing cards for casinos, valuables stored in a vault at a hotel, etc.

Resealable Tape Bags

We have wide variety in Resealable tape bags with polymer base like Ldpe, PP & Bopp. The user can open the sealed bags & again close the bag with the help of adhesive stick on the flap of plastic bags.

Bubble Bags

Bubble wrap is a flexible plastic sheeting containing numerous small air pockets, used in cushioning items during shipment. Standard average bubble diameter is 6.0 - 25.4 mm and height about 4 mm. Bubble wrap is lightweight, water resistant, reusable non-scratching and commonly used for packing fragile items.

Zip Lock Bags

Zip Lock (self-seal) Bags are closed at the top by squeezing the interlocking zipper together. Many brand names such as Mini Grip, Resealable, Gripseal, Reclosable or minigrip describe this type of bag. Ideal Where you want to secure contents and avoid leakage or contamination, no need of bag-sealer, staples or tape.

Stretch Films

Stretch wrap or stretch film is a highly stretchable plastic film that is wrapped around items. The elastic recovery keeps the items tightly bound. It is frequently used to unitize pallet loads but also may be used for bundling smaller items.
