About us

Stone Legend has been established in 2016, a natural extension of successful custom. It is major supplier of natural Stones to Commercial and Residential building projects. Our company gives first priority to the quality of the products it trades in. Working as prominent wholesaler of granite and other stones we have managed to become a known name in the domain. Our extensive and exclusive product range stands out from others due to its excellent quality and durability. The quality of our offered products has helped us garnered a remarkable position in the market as well as attaining a long list of clientele.

Quality Assurance: Quality has always been our chief objective. We are renowned among our customers for our trusted quality. To maintain good relations with our customers we uphold a strict quality policy. At our premise the quality marbles and granites are strictly checked for all kinds of discrepancies. Our team constantly keeps an eye over the marble's high efficiency and low cost. We are committed towards total customer satisfaction. We follow ethical business policies in all our business operations.

Customer's satisfaction: Being a client centric company, Fashion Marbles & Granite Company satisfies the never ending demands of our customers by their superior quality marbles, stones, granite, pebbles etc. We provide quality marbles & granite which are highly cost effective and give long lasting performance. We believe in serving our best to the customers by providing marbles of highest quality standards to the esteemed clients. Our team of professionals is committed to deliver various marbles and stones as per the specifications of our esteemed clients.

Using natural stones on countertops is an elegant way to design your interior, and they come with numerous benefits, like an enduring life-cycle, easy maintenance, and durability just to name a few. However, the reason why natural stones have been increasingly used as building materials of late is largely credited to their sustainability. Sustainability is a crucial factor in any process, as it yields long term financial benefits. A sustainable process facilitates a better understanding of the requirements of the end user, builds credibility in the market, and improves overall process through implementation of effective measures.

Natural stone is one of the materials that provides energy efficiency, conserves natural resources, and reduces waste and pollution. Well-known quarries where stones have been processed for many years have a better understanding of the process and hence, importing stones from these quarries has become a regular practice. It has already been established that granite, limestone, marble, sandstone, travertine or slate improves the sustainable level in architecture and design. Natural stone has a longer life cycle as they can endure many variables such as water, heat, cold, and dust– another reason why it's considered an environment-friendly material. It reduces energy consumption and emission of carbon dioxide in the atmosphere. Using natural stone as building material has been preferred over brick or wood as of late owing the reason to various favourable factors, such as their unique character, elegance, durability, and variety. All in all, sustainability supports your purchase as more of an investment. It is one of the most significant factors to consider when choosing a countertop for your interior.

Granite, marble and quartz have become highly desired choices for kitchen and bathroom countertops, with pricing that ranges from affordable to expensive. Some materials withstand a lot of abuse, some are suitable for active families and some are porous and susceptible to stains from acidic foods.
