## BEST CRAFTSMANSHIP

Finest skills are with us.

## ENDLESS DESIGN OPTION

Our team is full of new ideas and innovation.

# CONSTRUCTION

Construction is the process of constructing a building or infrastructure.

Construction differs from manufacturing in that manufacturing typically involves mass production of similar items without a designated purchaser, while construction typically takes place on location for a known client.

Building construction is the process of adding structure to real property or construction of buildings. The majority of building construction jobs are small renovations, such as addition of a room, or renovation of a bathroom. Often, the owner of the property acts as laborer, paymaster, and design team for the entire project.

**There are also other ways to Construct in Small Street,  
while there in no way**

Construction of residential building required following paper work before the start of actual construction. These steps are:-

- \*Preparation of drawings as per requirements of consumers.
  - \*Estimation of material cost, labor cost & contingencies.
  - \*Approval of drawings & estimates from Client.
  - \*Approval of drawings from City Development Authority. It is most important because residential building drawings should meet the authority defined rules.
  - \*Start of construction work either through contractor or labor hired on daily basis.
  - \*Marking of plot boundaries.
  - \*Cleaning of plot.
  - \*Preparation of site layout as per drawing.
-
