

Core Values

- Integrity
- Quality
- Respect
- Hardwork
- Commitment

Mission

To continuously innovate ways of making life easy for the entire ecosystem thus contributing towards global advancement

Vision

To be one of the top 20 packaging industries & top 10 tape industries in the world & become as 2000cr. company by 2025

Quality Firm

Rayan Plast is one of the renowned packaging and tape industry players across the nation today. At Rayan Plast, we pledge to deliver quality products, for we believe it is not just about providing quality products, but about providing quality services. Our well-qualified and professional staff meets all the quality standards from time to time and exceeds customer expectations every time.

Quality Products

More than 100 Types of Tapes with Different Specifications

We manufactured our product in single side adhesive and double side adhesive coating in Hot melt / Rubber / acrylic and silicon adhesive laminated with silicon release paper/ film on different base material of film / paper / foam / foil / cloth.

SINGLE SIDE ADHESIVE TAPES

1) **Film Base Tape** : We do adhesive coating of acrylic/rubber and silicon based adhesive with and without liner on various film base material.

◆ **BOPP Film Tape** :

BROWN TAPES

TRANSPARENT TAPES

COLOUR TAPES

PRINTED TAPES

Application/uses:

- Medium and heavy duty carton sealing
- Food industry
- Stationery purpose
- Pharmaceuticals and automobiles
- Gift wrapping & decoration
- Building and strapping
- Textiles, tiles manufactures, Garment industry and many more

◆ **Surface Protection (LDPE/PET) Film (Guard Film)** :

Application/uses:

- Aluminium profile
- PVC profile
- Glass
- Colour coated sheet
- Aluminium sheet
- Marble etc
- Stainless steel sheet

www.rayanplast.com

◆ **Polyster Film Tape/ Kapton Film Tape :**

Application/uses:

- Insulation in manufacturing of electrical components
- Application in powder coating
- Wave soldering in PCB manufacturing process.

◆ **PVC Film :**

Application/uses:

- Joining electrical wires & cables
- Splicing electrical wires & cables

◆ **Floor Marking Tape :**

Application/uses:

- Floor marking
- Aisle marking
- Color-coding application.

2) **Paper Base Tape :**

◆ **Masking Tape :**

Application/uses:

- Masking Application in Painting
- Carpenter Application
- General Uses

◆ **Kraft Paper Tape :**

Application/uses:

- Box packaging for export purpose

3) **Foam Base Tape :**

Application/uses:

- Gaskets, seals, heat or cold insulation in HVAC
- Automobile, refrigerator, air-conditioner
- Electronics appliance & electrical panel industries

4) **Foil Base Tape :**

Application/uses:

- Widely used in tubes and lead jointing for air conditioner, refrigerator & water heaters.
- For wrapping on pipes, engines and wires as a heat & water resistance.
- Used as a static ground application.

5) **Cloth Base Tape :**

◆ **Duct Tapes or Duck Tapes :**

Application/uses:

- Use in the HVAC
- For Automotive, Construction & Nuclear purpose
- Entertainment industries.

www.rayanplast.com

◆ **Water Proof/ Non Water Proof Cotton Cloth Tapes :**

Application/uses:

- Used in textile screen printing

◆ **Cotton Heat Curing Friction Tape :**

Application/uses:

- Used in heat resistance insulation for electrical LT cable.

◆ **PTFE Teflon Cloth Tape:**

Application/uses:

- Heat sealing application in packaging industries
- Aerospace
- Textile etc.

◆ **Filament tape :**

Application/uses:

- Heavy duty packing
- Household electrical appliance
- Fixing of machine parts
- Metallic or wooden furniture
- Steel industry etc...

DOUBLE SIDED ADHESIVE TAPES

1) **Film Base Material :**

◆ **Polyster Film Tape :**

Application/uses:

- Mounting Plastic parts
- Rubber Profile
- Acrylic Parts

◆ **Bag Sealing Tape :**

Application/uses:

- Soft Package materials, PE, OPP
- Permanent Bag Sealing

2) **Paper Base Material :**

Application/uses:

- Splicing of Films, Paper
- Advertising
- Lamination

3) **Foam Base Material :**

◆ **Eva Foam Tape :**

Application/uses:

- Mounting Acrylic / Metal Parts/ Plastic parts
- Automobile Spares etc.

◆ **Polyethylene Foam Tape :**

Application/uses:

- Mounting Acrylic / Metal Parts/ Plastic parts
- Automobile Spares etc.

www.rayanplast.com

◆ Acrylic Foam Tape (High Bond) :

Application/uses:

- Mounting & Fixation applications in appliances
- Electronic Devices
- Signage and graphics
- Glazing / Cladding
- Metal Labels
- General Purpose

◆ Spacer Tape :

Application/uses:

- Bonding Glass to Painted & Unpainted Metal.
- Glazing in Curtain Walls.

◆ Thermal Conductive Tape :

Application/uses:

- Used to Designers of Electronic Devices.
- Heat Sink for Thermal Conductivity.

4) Cloth / Foam Base Material for Flexographic Printing :

Application/uses:

- Polymer / Rubber Stereo Mounting
- Container Sealing, Affixing Carpets, Holding Interlayer Coils or Lugs
- Reinforcement Applications etc.

How to Use BOPP Tapes ?

-  Tape also comes off from laminated, wet or muddy boxes.
-  Press the tape firmly after fixing it to ensure that it stays in place.
-  Apply the tape in an '1' shape instead of '+' shape so that it stays firm.
-  For better results, use a tape dispenser.
-  Using a hot tape or hot box or even if they are kept in a hot place, reduces its gumming capacity resulting in improper fixing.
-  Use a tape of appropriate width depending on the size of the box.
-  Box should be filled to its correct capacity. Tapes will not stay in place on half filled boxes.
-  Tapes will not stay in place even on over-filled boxes.
-  While fixing, keep an extra 2.5-3 inches of tape on the sides.
-  Use a tape of suitable micron based on the thickness of the box.
