

DILIP KOCHAR - PROPRIETOR

ARIHANT ENTERPRISES

CNC & LASER CUTTING, ENGRAVING, CARVING

ABOUT THE MACHINING PROCESS

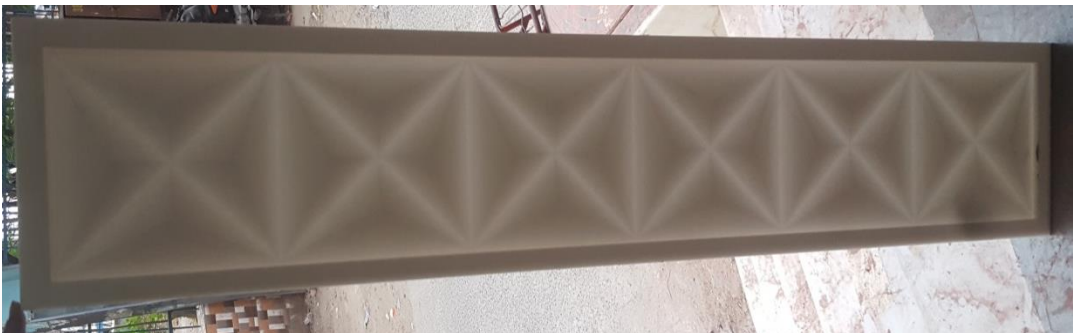

CNC machining is the process by which material is removed from a work piece with Computer Numerical Control (CNC) equipment that cuts away unwanted material. Parts are machined from 3D CAD models, processed by the computer and manufactured using the CNC machine. Metal, plastic, wood and aluminum are all good material for CNC & Laser machining

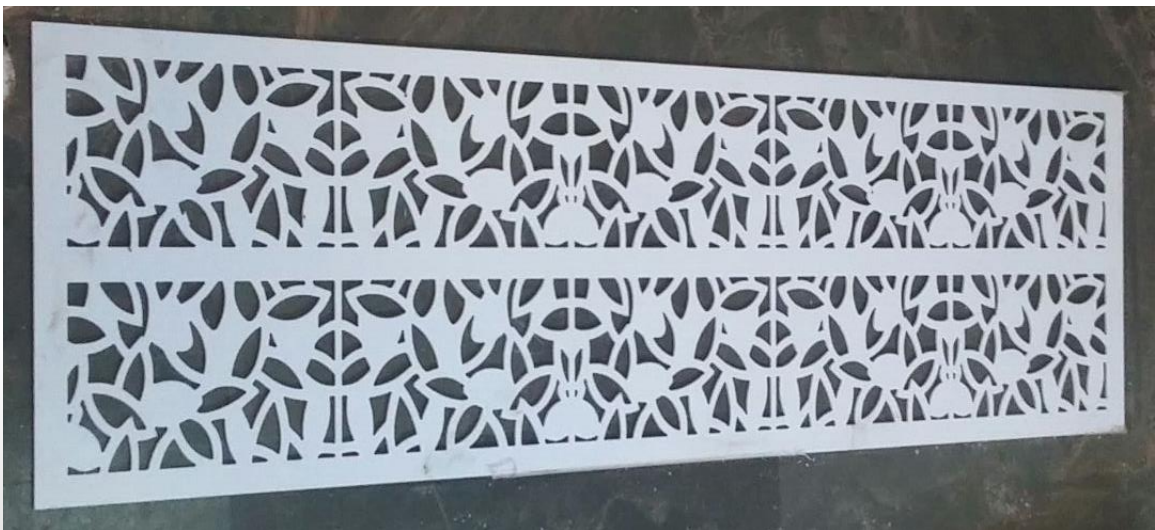

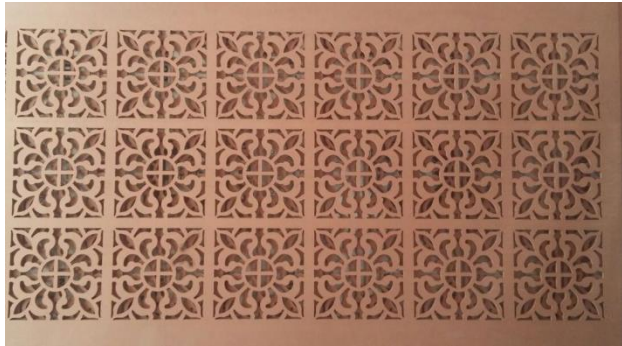

BUSINESS PROFILE

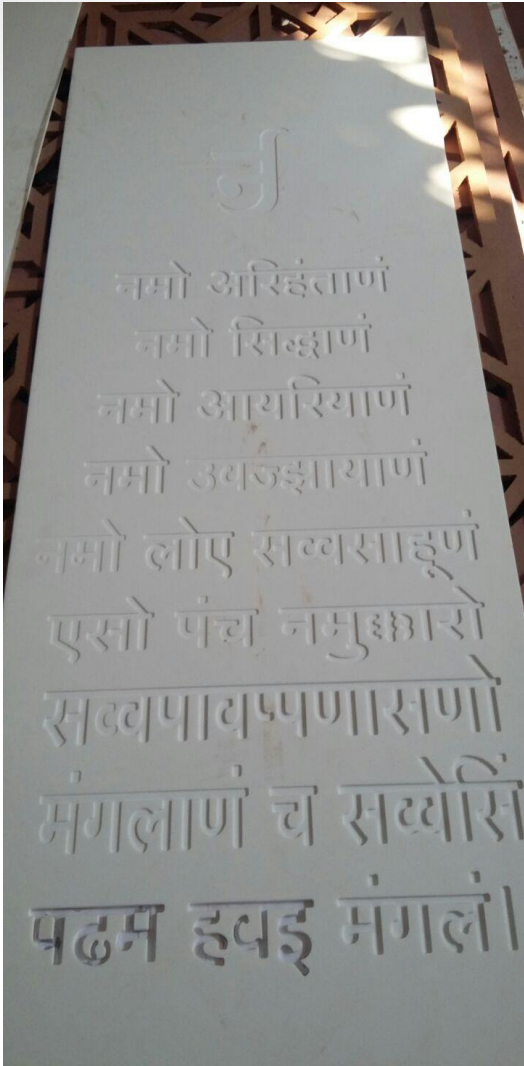

ARIHANT ENTERPRISES firm owns a CNC machine and a laser cutting machine used for CUTTING AND ENGRAVING various hard and soft materials, such as **wood, acrylic, Corian, composites, cement sheets, WPC(wood plastic composite), PVC, veneer, ACP, MDF, and other wood materials**. It was established in the year 2007

We do 2D design, V-carve design , full 3d design, cutting and engraving work with thickness range from 4mm - 50 mm
