MESSAGE FROM MANAGEMENT

If you are looking for a solution to your wastewater problems and Drinking or Process Water We assure you that you have come to the right place.

AQUA STAR

We have highly qualified and trained engineer's team to provide the best in industry after sales service, We have two service centers in Gujarat Ahmedabad & Vapi respectively and planning for more offices across in India. Aqua Star Industries is a well-known name in the environment sector in general and waste water treatment in particular. The company provides consultancy, manufactures equipment and executes Turn Key Projects in the field of Waste Water treatment, Effluent treatment, Sewage treatment and Industrial R.O. Purification Systems, Chilling Plants, Water Cooler & UV Plants.

The Ultra Violet way of purification will only kill bacteria and viruses and is widely used where purified Municipal water is available. However, the water we drink contains insecticide & pesticides which causes cancer, sodium which causes heart disease, calcium which causes kidney stones, magnesium which causes gall bladder stones, lead which leads to mental retardation, fluoride which causes fluorosis, arsenic which causes poisoning and iron which causes constipation & dysentery. The only safest solution we have is Reverse Osmosis Pure Water Systems (RO).

AQUA STAR
