Trendy Clothes for

Cool Kids

About Us

The legacy of Star knittees started off in the year 2000, being one of the best companies in the domestic kidswear market. The success of the company, has been possible due to the unparalleled work of Mr. C Valliappan, who has very good knowledge and experience in the garment industry for over 25 years.

The main objective of the company is to manufacture kids wear that matches international standards. This is made possible by our hardworking team who put every child's need first. We target young fashionable consumers throughout India and reach them with the help of our best dealers and distributors who have huge connections to make this happen.

Since its inception, the company has expanded consistently without compromising the quality of its products. We create unique clothing that caters right from just born to young toddlers, precisely involving 0-3 years. Our collection of rich soft cotton clothing makes sure that babies always stay safe and comfortable.

We have our own designing department and with their expertise, we find better ways to make exceptionally best clothing. This industry is a journey, and we are constantly learning and improving ourselves at every step of the way.
